

OLYMPIC GAMES PERFORMANCE

STORY

The Olympics are held every 4 years, alternating between Summer and Winter Olympics every two years. Thousands of athletes representing various countries compete while Their nations watch hoping for their country to be the best at various competitions.

AUDIENCE

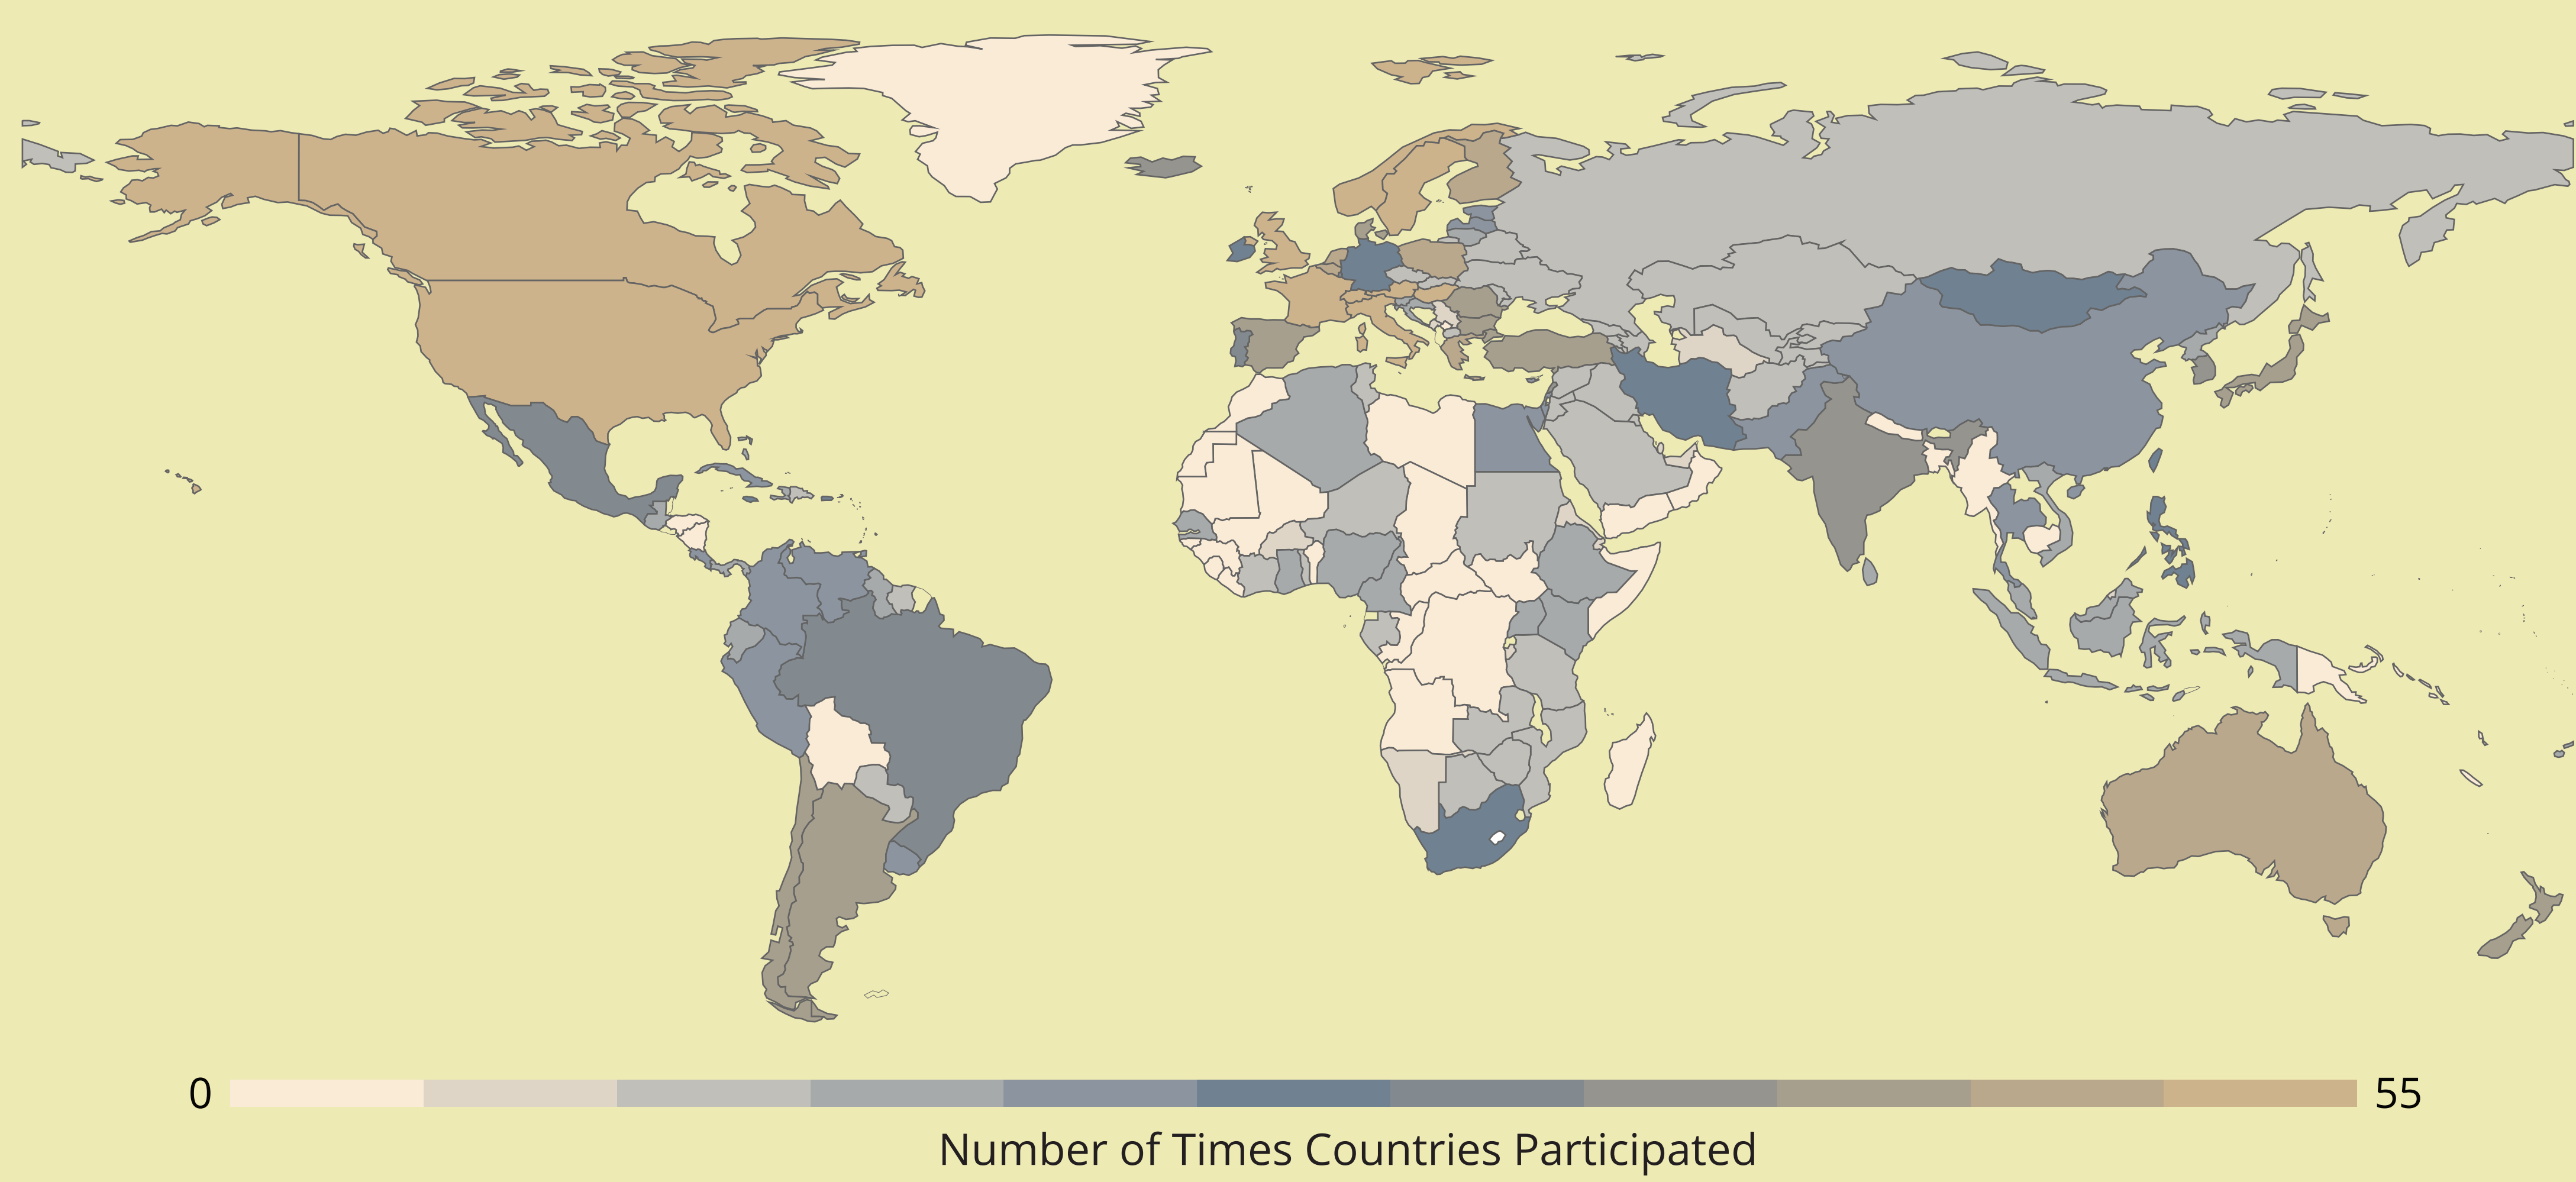

My audience would be anyone who cares about national pride in their athletes. Another set of audience would be amateur athletes who wants know which country does well in the Olympics so they can choose which country to participate in the future.

DATASET

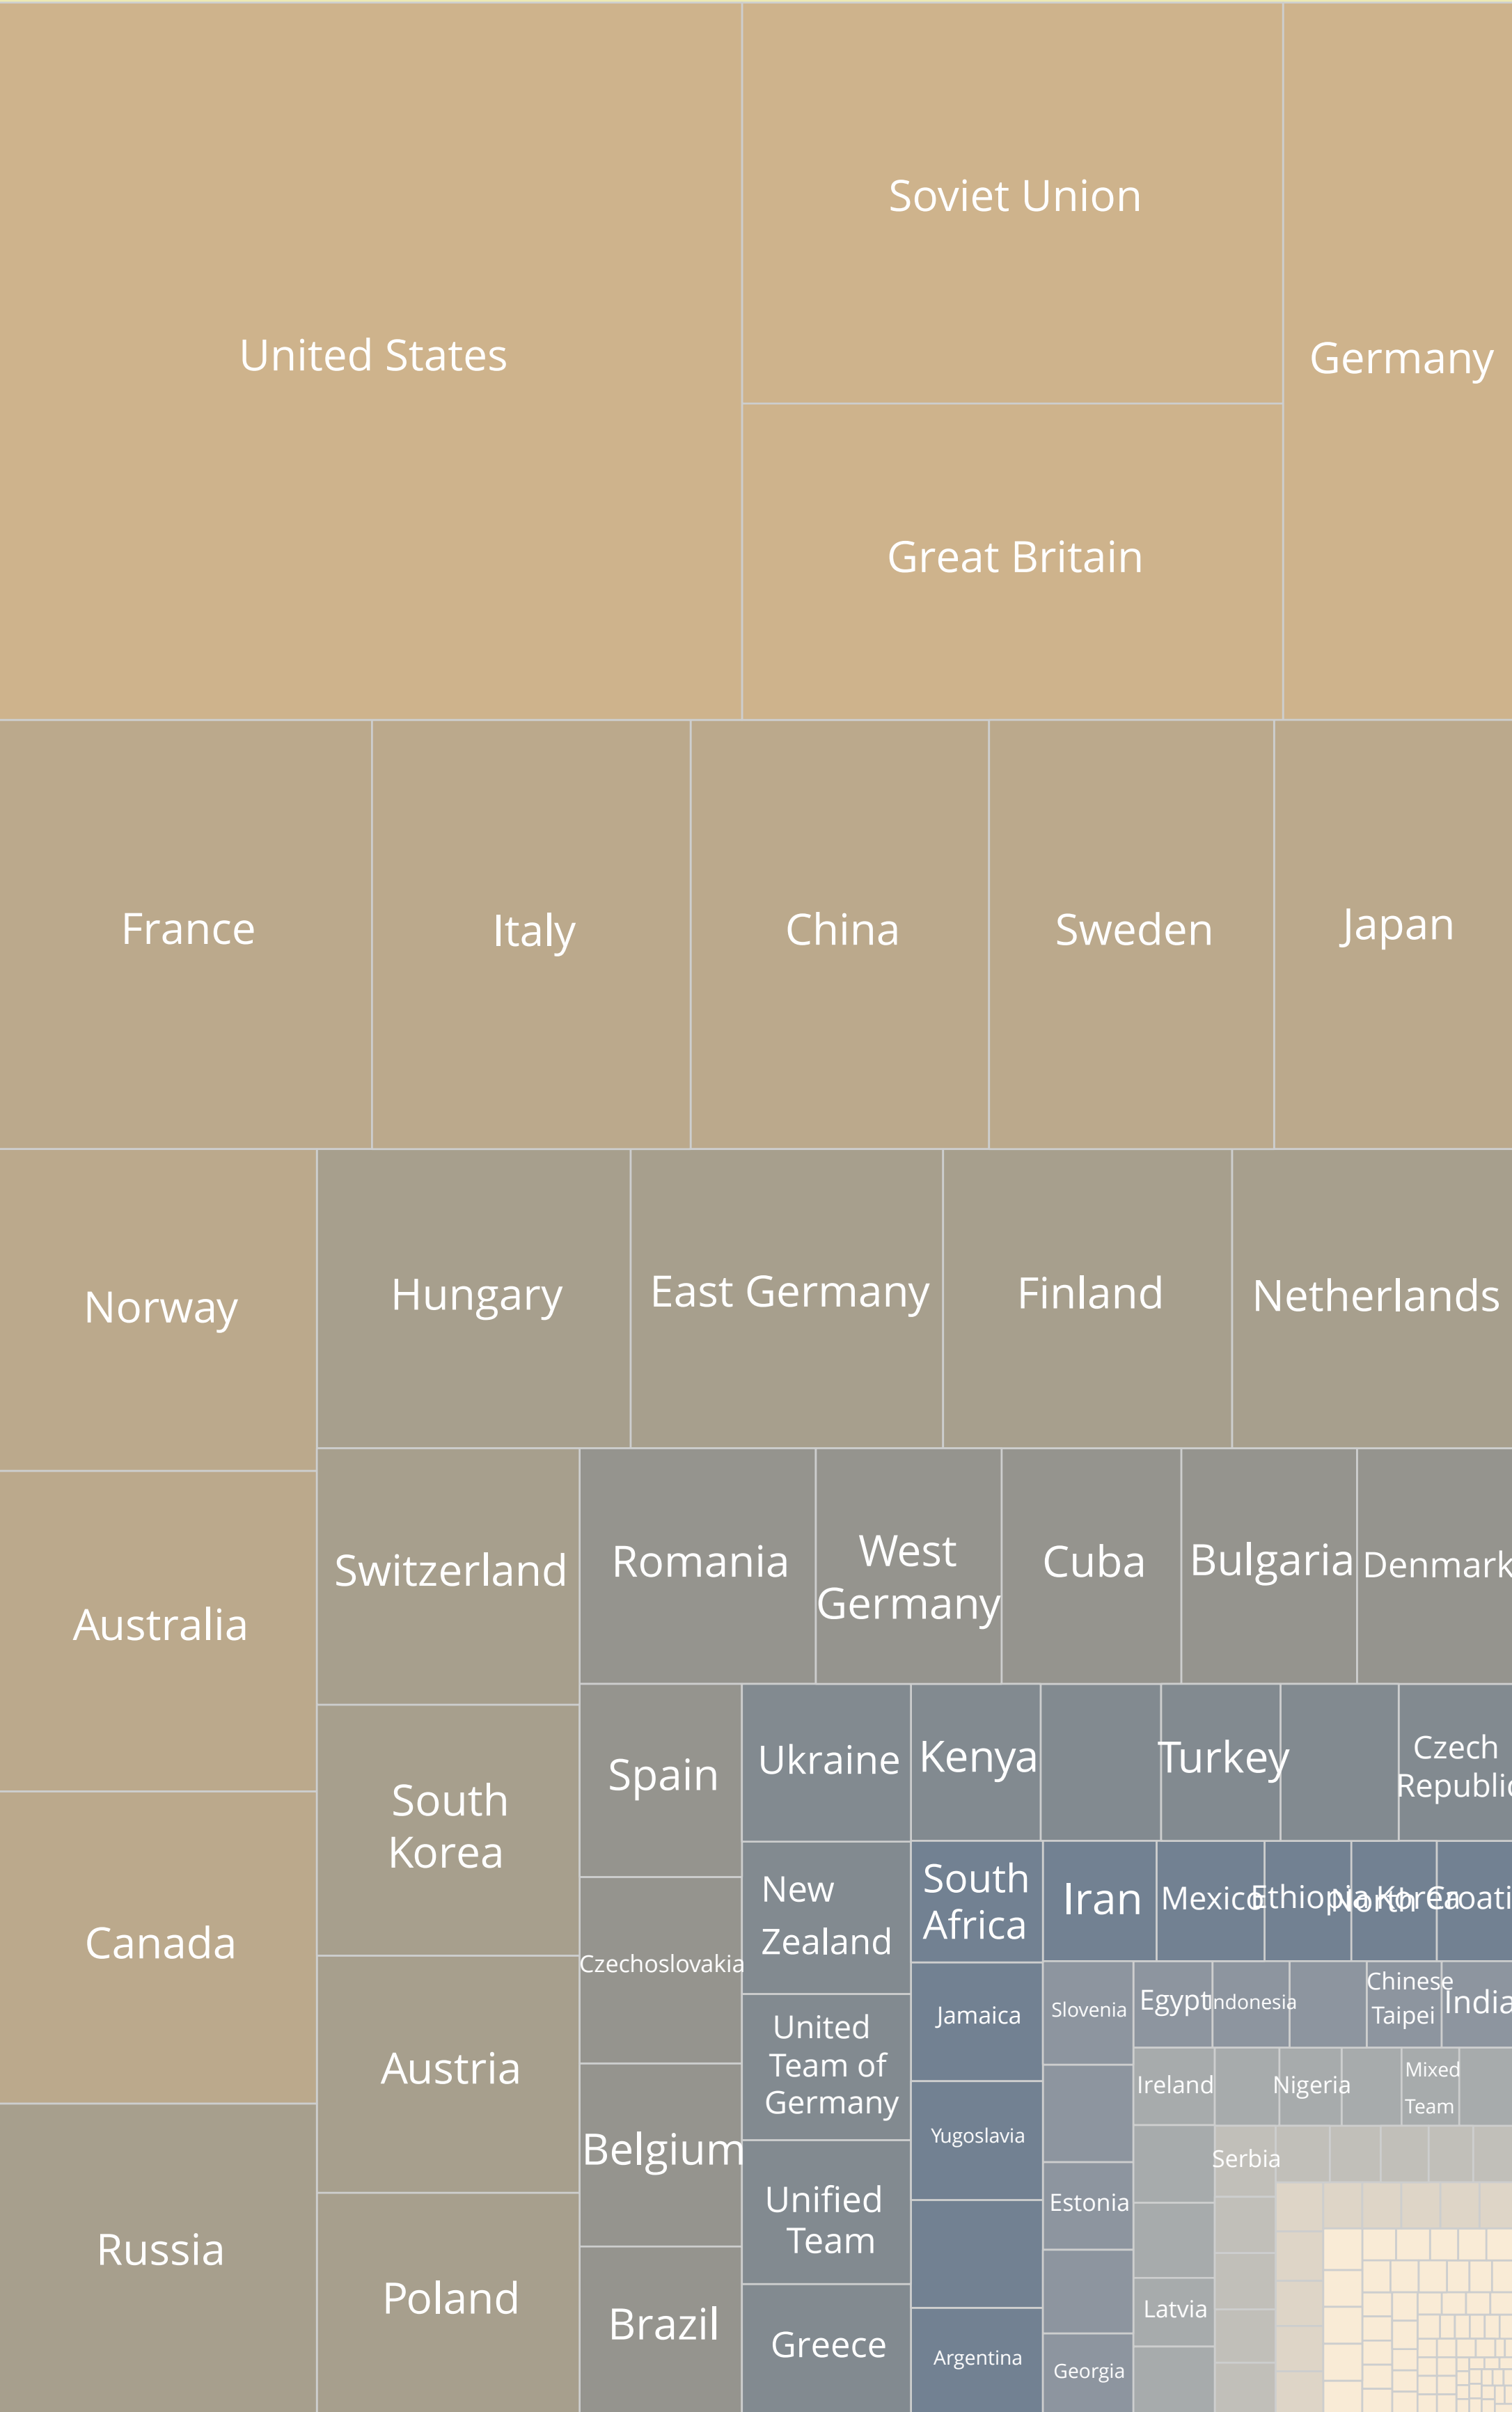

This dataset shows the performance of nations who participated in either the Summer or Winter Olympics since 1896 until 2022. There are 17 columns and 156 rows. The attributes include country names, IOC codes, total gold, silver and bronze medal for both Summer and Winter Olympics. It was retrieved from Kaggle and Wikipedia to fill in any missing values.
